

ARCHITECTURAL & *INTERIOR CONCEPT* DESIGNER

Auckland, New Zealand

20+ years of design experience

PROFESSIONAL PROFILE

Auckland-based designer with more than 20 years of experience across architecture, interiors and visual communication. I specialise in finding the central spatial idea and carrying it consistently from architectural planning and exterior form through to interior space.

My work combines concept design with photoreal visualisation and walkthrough animation, helping clients and project teams understand scale, sequence, materials, atmosphere and daily experience before construction.

CORE EXPERTISE

01

Architectural planning

02

Exterior concept

03

Interior spatial concept

04

Visualisation & film

SELECTED PROJECT 01 / LOCAL NEW ZEALAND EXPERIENCE

North Shore Residence

AUCKLAND, NEW ZEALAND / RESIDENTIAL RENOVATION CONCEPT

A local residential concept connecting exterior transformation, architectural planning, interior reorganisation and landscape as one continuous design response.

PROJECT SCOPE

- Existing-home analysis and architectural planning
- Exterior transformation and facade concept
- Interior planning, suite relationships and landscape integration
- Photoreal concept visualisation

Villa No. 17

PRIVATE RESIDENCE / ARCHITECTURE + LANDSCAPE + INTERIORS

CONCEPT AND SCOPE

A complete residential concept developed from architectural planning and massing, through the architectural concept, facade and arrival sequence, to the interior spatial concept.

Architecture, landscape and interiors form one continuous spatial journey. The proposal is communicated through still visualisation and two full walkthrough films.

DESIGN SEQUENCE

- Architectural planning and massing
- Building form, facade and arrival
- Landscape and pool-axis integration
- Interior circulation and spatial concept
- Still visualisation and walkthrough animation

HOW I CONTRIBUTE

CONCEPT CLARITY

Turn early ideas into a coherent architecture-to-interior direction.

CLIENT COMMUNICATION

Use images and motion to make spatial decisions easier to understand.

FAST EXPLORATION

Develop and compare design options efficiently with an AI-assisted workflow.
